5:55 Ballet I (8y+)*										

Don't see a time that fits, please let us know as we are always looking for suggestions!:))

Classes with an asterisk (*) are not included with the Class Pass.

Creation Station: An open-ended class that encourages self-directed play using materials of various textures and characteristics. Loose parts activities offers lots of opportunities for fine motor skill development and freedom of expression.

Pre-K STEAM: Science, Technology, Engineering, Art and Math for preschoolers. Students explore concepts like gravity, structures, animals, colors and mixtures with engaging lessons and lots of opportunities for hands-on activities.

Preschool Cooking: Students learn about math, science, following directions, and healthy eating all while having fun making something delicious to eat!

Meet the Masters: Students will learn about the style and history of the Great Masters, such as Mondrian, Warhol, Monet, and others, and create their own masterpiece.

School Readiness: A class for preschoolers that teaches math and phonics. Using dynamic and hands-on activities, students will learn Math concepts such as one-to-one correspondence, geometry and spatial relations, measurement, and patterns. The Phonics program will help students discover and practice the connections between letters and their sounds. For ages 3-6y.

Storytime Art: Students will make an art project to make a connection with a beloved book.

Early Readers:For students who already know their letters and sounds and know how to put them together to form words. We will use the BOB Books curriculum as a foundation to read books. For ages 4&up

Zumbini: Created by Zumba® and BabyFirst for kids ages 0-4, the Zumbini® program combines music, dance and educational tools for 45 minutes of can't-stop, won't-stop bonding, learning, and fun! Register separately on zumbini.com.

All About ABCs: A class to equip students with pre-reading skills through stories, activities, and exercises with lots of fine motor skill practice.. The focus will be on letter recognition and sound as well as words starting with the letter of the day. For ages 18m-6y

Eco Art: With a little creativity, almost anything can be turned into art. In every class, students will upcycle various materials into a wonderful piece of art. Lots of practice with fine motor skills will take place through the use of scissors, glue sticks, markers, pipe cleaners, and other “tools”

Playdough with Plato: There's more to playdough than just squishing the dough. Students will make a fresh batch of playdough in every class and use it to learn about shapes, letters, counting, animals and other everyday objects. If you're looking for a class for mixed age siblings, this is the perfect class for them because the older child can work on the higher level activity (numbers, letters, patterns, etc) while the younger child works on her fine motor skills like rolling, cutting and stamping.

Sensory Art: Perfect for kids who are tactile learners and like to engage their sense at their own pace. Students will learn how to explore, investigate and create while using their five senses (touch, sight, sound, smell, and taste).
